ABSTRACT

Designed as supplemental material to on-going instruction in the vocational program, this second of three picture dictionary booklets in the Allied Health series is intended to assist the learning handicapped student to master the core vocabulary taught in the trade. Intended for individual or small group instruction with minimal supervision, this module contains four lessons: (1) Body Positions, (2) Bed Positions, (3) Travel Aids, and (4) Wheelchair. The format for each lesson includes (1) general directions, with a list of words taught in that lesson, and (2) each word presented on a separate page with a representative picture and simple definition. (The module is intended for use with a cassette tape and flash cards.) An alphabetical index to the vocabulary words in the module is given at the back of the booklet. Two other dictionaries in this series are available as CE 024 407 and CE 024 409. An accompanying teacher's manual is available separately as CE 024 406. (This is one of five series of materials developed by Project HIRE. The two-volume final report of the project is available as CE 024 117 and CE 024 118. See Note for the other series.) (YLB)

ALLIED HEALTH

BOOK II

Table of Contents

Lesson No.	Lesson	Page No.
8	Body Positions	68
	Bed Positions	74
10	Travel Aids	80
11	Wheelchair	85

BOOK II

Lesson 8

Body Positions

ALLIED HEALTH

Lesson 8

DIRECTIONS:

1. The words in this lesson are:

   ambulatory
   non-ambulatory
   alignment
   supine
   prone
   sim's position

2. Each word has its own page with a picture. Under the picture, you will find the meaning of the word.

3. Turn the pages and look at the words while you listen.

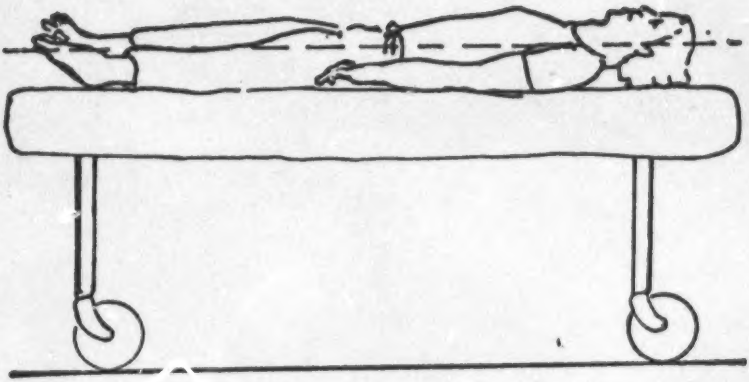
4. When you get to the last word, turn back to page 68. The tape will say the words again.

ambulatory

Ambulatory means that the patient is able to walk.

non-ambulatory

A patient who cannot walk and needs to be on a gurney, in a wheel-chair or in bed.

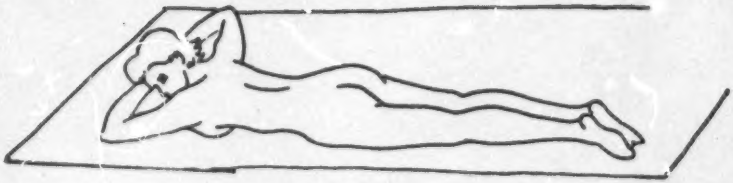


alignment

Alignment means the body is in a straight line.

supine

Supine means to lie on one's back with the face up.



prone

Prone means to lie
flat on the stomach
with the face down.

sim's position

Sim's position is the normal sleeping position. The patient is on the left side with the right arm and leg bent.

2. When you have the cards, look at the first picture and see if you know the meaning of the word.

3. Turn the card over and see if you are right.

4. Do the other cards in the same way.

5. If you do not get each one right, listen to the tape again. Then try the cards again.

6. If you do get them all right, ask your teacher for Activity 8.
Now rewind this tape and get cards 68 to 73.

BOOK II

Lesson 9

Bed Positions

ALLIED HEALTH

Lesson 9

DIRECTIONS:

1. The words in this lesson are:

   bedrest
   fowler's position
   semi-fowler's position
   trendelenberg
   stryker frame
   traction

ALLIED HEALTH

Lesson 10

DIRECTIONS:

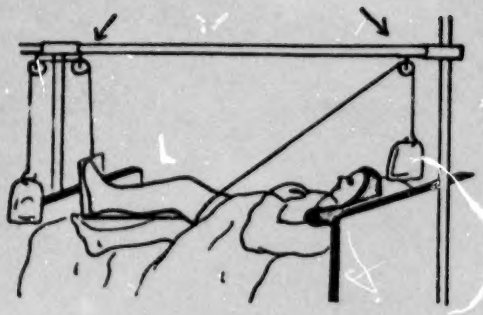
1. The words in this lesson are:

   gurney
   ramp
   walker
   crutch
   cane

BOOK II

Lesson 10

Travel Aids



traction

Traction is equipment put upon a bed. Traction is used to lift an arm or leg and keep it straight.

DIRECTIONS CONTINUED:

1. Now you should get cards 74 to 79 from the box.

2. When you have the cards, look at the first picture and see if you know the meaning of the word.

3. Turn the card over and see if you are right.

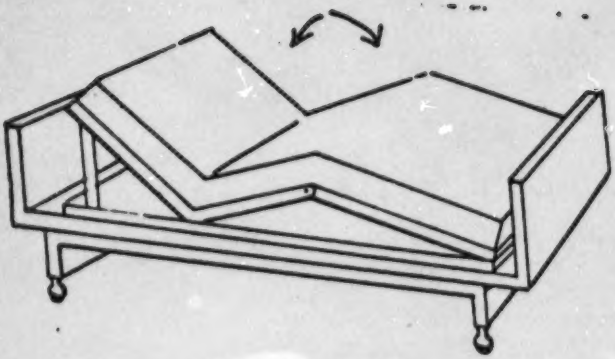
4. Do the other cards in the same way.

5. If you do not get each one right, listen to the tape again. Then try the cards again.

6. If you do get them all right, ask your teacher for Activity 9
Now rewind this tape and get cards 74 to 79.

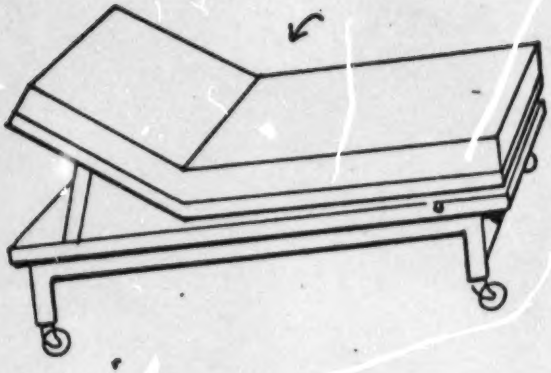
bedrest

Bedrest means that a person must stay in bed.



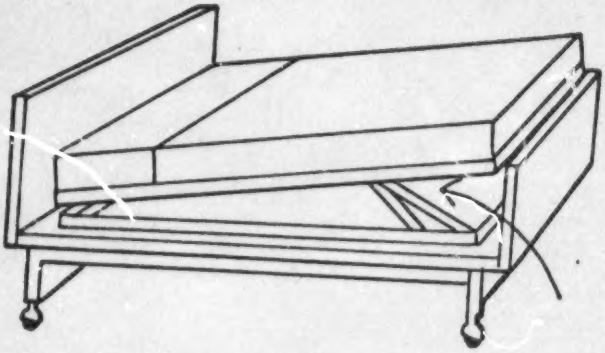
fowler's position

Fowler's position means placing the patient so that the patient is half-sitting with his knees bent.



semi-fowler's position

Semi-fowler's position means placing the patient so that the head is raised higher than the feet.



trendelenberg

Trendelenberg means placing the patient so that the body is raised higher than the head. It is also called the dorsal position.

stryker frame

A stryker frame is a bed that can be turned to any position. It is on a round, wheel-like frame.

Each word has its own page with a picture. Under the picture, you will find the meaning of the word.

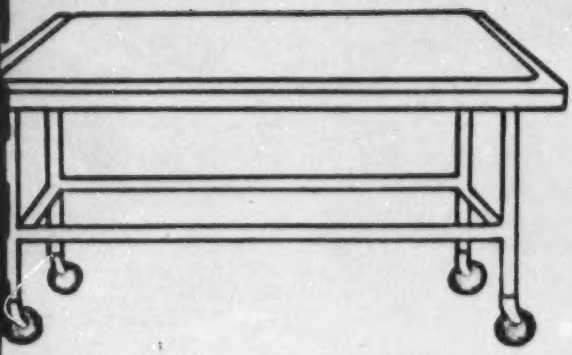
Turn the pages and look at the words while you listen.

When you get to the last word, turn back to page . The tape will say the words again.

Each word has its own page with a picture. Under the picture, you will find the meaning of the word.

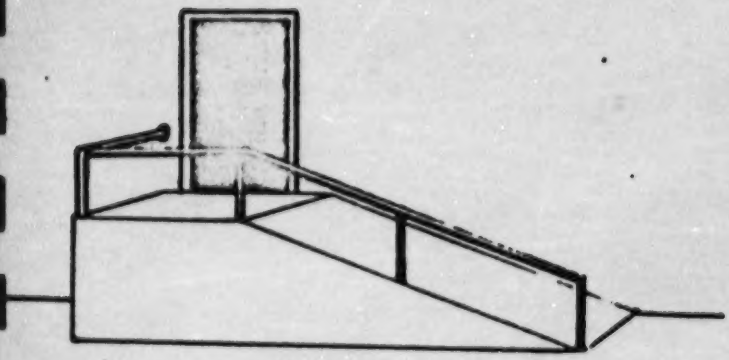
Turn the pages and look at the words while you listen.

When you get to the last word, turn back to page . The tape will say the words again.



urney

gurney is a metal table
n wheels used to move
atients from one place
o another. Gurney is
nother name for
tretcher.



ramp

A ramp is a slanting floor or walkway leading from one level to another.

alker

A cane is used to help the patient keep his balance when he has general body weakness.

DIRECTIONS CONTINUED:

1. Now you should get cards 80 to 84 from the box.

2. When you have the cards, look at the first picture and see if you know the meaning of the word.

3. Turn the card over and see if you are right.

4. Do the other cards in the same way.

5. If you do not get each one right, listen to the tape again. Then try the cards again.

6. If you do get them all right, ask your teacher for Activity 10. Now rewind this tape and get cards 80 to 84.

BOOK II

Lesson 11

Wheelchair

ALLIED HEALTH

Lesson 11

IRECTIONS:

. The words in this lesson are:

wheelchair
spokes
armrest
footplate
hand rim
tipping lever
brake

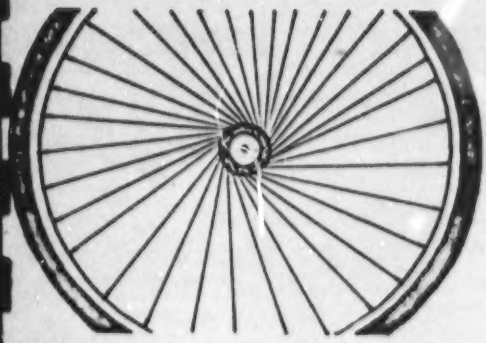
wheelchair

A wheelchair is a chair with wheels. A wheelchair is used to move patients from one place to another.

Each word has its own page with a picture. Under the picture, you will find the meaning of the word.

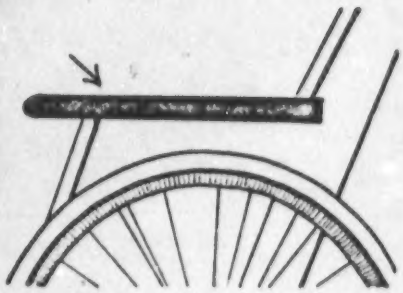
Turn the pages and look at the words while you listen.

When you get to the last word, turn back to page . The tape will say the words again.



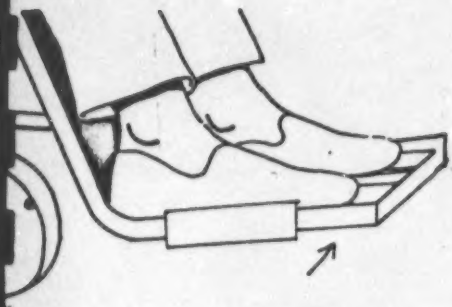
spokes

Spokes are the wires that connect the edge of the wheel to the center of the wheel. Keep clothes and blankets away from spokes.



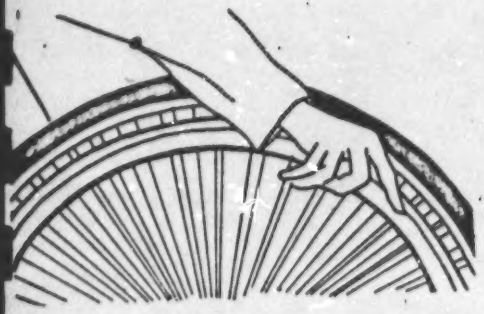
armrest

An armrest holds up the arms and the upper half of the body. Patients being moved must be reminded to keep their arms on the armrest to protect them.



ootplate

footplate is a flat
lat at the bottom of
he wheelchair that
olds the feet.



hand rim

A hand rim is a metal rim fastened to the wheel. The patient uses the hand rim to move and to steer the wheelchair.

tipping lever

A tipping lever is a bar on the wheelchair. You step down on the tipping lever to help move the wheelchair over bumps.

brake

The brake is the part of the wheelchair that stops the wheelchair from moving.
